

Challenge (Habanero)

- Q1.** In a stem-and-leaf plot for the scores of a new video game, the stem is the 10's digit. If the leaves are 2, 5, 8, 1, 9, what are the actual scores?
(A) 12, 15, 18, 11, 19
(B) 22, 25, 28, 21, 29
(C) 12, 25, 28, 11, 19
(D) 22, 15, 18, 21, 29
(E) 12, 15, 18, 11, 29
- Q2.** What is the primary purpose of a stem-and-leaf plot in data analysis?
(A) To display the mean of a dataset
(B) To show the distribution of data
(C) To calculate the median of a dataset
(D) To create a histogram
(E) To find the mode of a dataset
- Q3.** A gaming company has the following data on the number of hours played by users: 10, 12, 15, 18, 20, 22, 25. If we create a stem-and-leaf plot, what would be the stem for the data point 18?
(A) 1
(B) 2
(C) 10
(D) 18
(E) 20
- Q4.** The stem-and-leaf plot below shows the scores of a math test: 4|2, 5, 8 5|1, 3, 6. What is the score with the 5 in the tens place and 1 in the ones place?
(A) 51
(B) 52
(C) 53
(D) 54
- (E) 55
- Q5.** In a stem-and-leaf plot for exam scores, the stem is the 10's digit. If a data point has a leaf of 7, what is its actual value if the stem is 4?
(A) 47
(B) 57
(C) 67
(D) 77
(E) 87
- Q6.** What does the leaf represent in a stem-and-leaf plot?
(A) The tens digit of a number
(B) The ones digit of a number
(C) The hundreds digit of a number
(D) The thousands digit of a number
(E) The ten thousands digit of a number
- Q7.** The following stem-and-leaf plot displays the number of coding errors per 100 lines of code: 0|2, 4, 6 1|0, 2, 5. What is the range of the data?
(A) $6 - 2 = 4$
(B) $10 - 2 = 8$
(C) $12 - 4 = 8$
(D) $15 - 5 = 10$
(E) $20 - 0 = 20$
- Q8.** The stem-and-leaf plot below shows the high scores for a game: 8|2, 5, 9 9|1, 4, 7. What is the highest score?
(A) 85
(B) 89
(C) 91
(D) 94
(E) 97

Open Ended Questions (FRQ)

- Q9.** Create a stem-and-leaf plot for the following data on the number of players online: 23, 25, 28, 30, 32, 35, 38, 40. Use the tens digit as the stem.
- Q10.** Explain how to interpret the distribution of data from a stem-and-leaf plot and provide an example using a dataset of exam scores: 42, 45, 48, 50, 52, 55, 58.

Chef's Tips

1

- Tip 1: Ensure to use the correct scale when creating a stem-and-leaf plot.
- Tip 2: Pay close attention to the stem and leaf when interpreting the distribution of data.
- Tip 3: Use real-world examples to make the concept more relatable and interesting for students.
