

Homework (Jalapeno)

- Q1.** In a stem-and-leaf plot, what does the 'stem' represent?
- (A) The middle value
(B) The first digit of a number
(C) The last digit of a number
(D) The range of values
(E) The mode of the data
- Q2.** What is the purpose of a stem-and-leaf plot?
- (A) To calculate the mean of a dataset
(B) To visualize the distribution of a dataset
(C) To find the median of a dataset
(D) To determine the range of a dataset
(E) To identify outliers in a dataset
- Q3.** The ages of 10 ancient Egyptian pharaohs are: 23, 25, 30, 32, 35, 40, 42, 45, 50, 55. What is the stem in the stem-and-leaf plot?
- (A) 2
(B) 3
(C) 4
(D) 5
(E) 6
- Q4.** The heights of 8 ancient Greek ruins are: 15, 18, 20, 22, 25, 28, 30, 32. How many leaves are in the stem-and-leaf plot for this data?
- (A) 4
(B) 5
(C) 6
(D) 7
(E) 8
- Q5.** The scores of 9 students on a history test are: 80, 85, 90, 92, 95, 98, 80, 82, 88. What is the most frequent score in the stem-and-leaf plot?
- (A) 80
(B) 85
(C) 90
(D) 92
(E) 98
- Q6.** A stem-and-leaf plot shows the distribution of the number of artifacts found at an archaeological site. If the stem is 1 and the leaves are 2, 4, 6, 8, what are the actual values of the number of artifacts?
- (A) 12, 14, 16, 18
(B) 12, 14, 16, 18, 20
(C) 10, 12, 14, 16
(D) 10, 12, 14, 16, 18
(E) 20, 22, 24, 26
- Q7.** In a stem-and-leaf plot, what does a stem of 4 and leaves of 1, 3, 5 represent?
- (A) The numbers 41, 43, 45
(B) The numbers 40, 41, 42
(C) The numbers 14, 15, 16
(D) The numbers 30, 31, 32
(E) The numbers 50, 51, 52
- Q8.** A stem-and-leaf plot has a stem of 2 and leaves of 0, 2, 4, 6, 8. What is the range of the data?
- (A) 8
(B) 16
(C) 20
(D) 24
(E) 28

Open Ended Questions (FRQ)

- Q9.** Create a stem-and-leaf plot for the following ages of 12 ancient Roman emperors: 25, 30, 31, 32, 35, 40, 42, 45, 50, 52, 55, 58. Identify the median and mode of the data. Provide your answers in the space below.
- Q10.** The following is a stem-and-leaf plot of the lengths of 10 ancient stone bridges:
- | Stem | Leaves |
|------|------------|
| 3 | 1, 4, 5, 7 |
| 4 | 0, 2, 3, 9 |
| 5 | 1, 6 |
- Interpret the distribution of the data and provide at least two observations about the data in the space below.

Chef's Tips

- Tip 1: Emphasize the importance of accurate stem-and-leaf plot construction.
- Tip 2: Encourage students to use real-world examples to practice interpreting stem-and-leaf plots.
- Tip 3: Remind students to label their axes and provide a key when creating stem-and-leaf plots.
