

Advanced (Carolina Reaper)

Open Ended Questions (FRQ)
Q9. An alcohol solution is 15

Q10. A chemist needs 40 gallons of a 35

Chef's Tips

- Tip 1: Remind students to read¹ questions carefully and identify the key elements of the mixture problem.
- Tip 2: Encourage students to use visual aids such as diagrams or charts to help solve mixture problems.
- Tip 3: Make sure students understand that the resulting mixture concentration is a weighted average of the concentrations of the individual mixtures.
