Open Ended Questions (FRQ)

Q9. A bakery sells a total of 480 loaves of bread per day. They sell a combination of whole wheat and white bread in a ratio of 3 : 5. How many loaves of each type of bread are sold per day? Show your work and explain your reasoning.

Q10. A car travels from City A to City B at an average speed of 60 miles per hour. On the return trip, the car travels at an average speed of 40 miles per hour. What is the average speed for the entire round trip? Use a ratio to model the situation and show your work.

Chef's Tips

1

- Tip 1: Make sure students have a calculator and necessary tools.
- Tip 2: Encourage students to show their work and explain their reasoning.
- Tip 3: Emphasize the importance of checking units and ensuring they match the question.
