Open Ended Questions (FRQ)

Q9. Find the inverse of $f(x) = x^2 - 4x + 3$. Verify your answer using composition.

Q10. A city's population P (in thousands) is modeled by $P(t) = 2t^2 + 5t + 1$, where t is the number of years since 2000. Find the inverse of $P(t)$. Interpret the result in the context of the problem.

Chef's Tips

- Remind students to check their work using composition.
- Encourage students to interpret their results in the context of the problem.
- Allow students to use calculators to verify their answers.
