

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. If $f(x) = x^2 - 1$ and $g(x) = 2x + 1$, find $(f + g)(x)$ and $(f - g)(x)$, and determine their domains.

Q10. Given $f(x) = \frac{1}{x-2}$ and $g(x) = x^2 + 1$, find $(f \cdot g)(x)$ and simplify the resulting expression. Then determine the domain of $(f \cdot g)(x)$.

Chef's Tips

- Check calculations carefully
- Make sure to simplify expressions
- Domain considerations are crucial for combined functions
