Open Ended Questions (FRQ)

Q9. Solve the following system of equations: $x + 2y = 7$, $3x - 2y = 5$. What are the values of x and y ?

Q10. A bakery sells a total of 250 loaves of bread per day. They sell a combination of whole wheat and white bread. If x is the number of loaves of whole wheat bread and y is the number of loaves of white bread, and $x + y = 250$, and $x = 30 + 0.5y$, find the number of loaves of whole wheat bread and white bread sold, and determine the reasonableness of the solution.

Chef's Tips

1

- Tip 1: Make sure to read each question carefully and identify what is given, what is needed, and what the question is asking.
- Tip 2: Use the given equations and formulas to solve for the unknowns and answer the question.
- Tip 3: Check the units and reasonableness of the solutions.
