Open Ended Questions (FRQ)

- Q9.** Tom has been saving money for a new bike and has 120. *He wants to buy a bike that costs 180.* Tom's parents have agreed to give him an allowance of 10 *per week for doing chores. However, Tom also spends 5* per week on snacks. Using inequalities, determine how many weeks it will take Tom to have enough money to buy the bike. Show all work and explain your answer.
- Q10.** Ashley is planning a road trip from City A to City B. The distance between the two cities is 240 miles. Ashley's car gets 30 miles per gallon, and gas costs 2.50 *per gallon. Ashley also wants to budget for food and lodging, which will cost 10* per hour of driving. If Ashley drives at an average speed of 40 miles per hour, how much will the total trip cost? Use inequalities to determine the maximum amount Ashley can spend on the trip.

Chef's Tips

- Tip 1: Ensure students have the necessary materials before starting the test.
- Tip 2: Remind students to read each question carefully and choose the correct answer.
- Tip 3: Encourage students to show their work for Free Response questions.
