

Unit: 6 Unit 8: Quadratics

Topic: Systems of Linear and Quadratic Equations

Name: _____

Date: _____

Foundation (Jalapeno)

Open Ended Questions (FRQ)

Q9. Solve the system: $y = 2x - 1$, $y = x^2 + 3x - 2$. *Provide all intersection points.*

Q10. Find the intersection points of $y = x^2 - 2x - 1$ and $x - 3y = 2$. *Show your work.*

Chef's Tips

- Remind students to check their solutions by plugging the values back into the equations.
- Encourage students to use the graphical method to visualize the intersection points.
- Instruct students to label their answers clearly and to show all work for the free response questions.
