

Advanced (Habanero)

- Q1.** What is the purpose of a stem-and-leaf plot?
- (A) To display the mean of a dataset
 - (B) To show the distribution of a dataset
 - (C) To calculate the range of a dataset
 - (D) To find the median of a dataset
 - (E) To create a box plot
- Q2.** Which of the following is a characteristic of a stem-and-leaf plot?
- (A) It is used for categorical data
 - (B) It is used for numerical data
 - (C) It displays the mode of a dataset
 - (D) It is a type of bar graph
 - (E) It is a type of pie chart
- Q3.** What does the 'stem' represent in a stem-and-leaf plot?
- (A) The ones digit of a number
 - (B) The tens digit of a number
 - (C) The hundreds digit of a number
 - (D) The first digit of a number
 - (E) The last digit of a number
- Q4.** What does the 'leaf' represent in a stem-and-leaf plot?
- (A) The ones digit of a number
 - (B) The tens digit of a number
 - (C) The hundreds digit of a number
 - (D) The first digit of a number
 - (E) The last digit of a number
- Q5.** Which of the following datasets would be best represented by a stem-and-leaf plot?
- (A) Temperature readings in degrees Celsius
 - (B) Number of students in a class
 - (C) Names of countries in a region
 - (D) Types of cars on the road
 - (E) Colors of the rainbow
- Q6.** What can be determined from a stem-and-leaf plot?
- (A) The mean of the dataset
 - (B) The median of the dataset
 - (C) The mode of the dataset
 - (D) The range of the dataset
 - (E) All of the above
- Q7.** How do you determine the stem of a number in a stem-and-leaf plot?
- (A) By taking the first digit of the number
 - (B) By taking the last digit of the number
 - (C) By taking the middle digit of the number
 - (D) By taking all but the last digit of the number
 - (E) By taking all but the first digit of the number
- Q8.** Which of the following is an advantage of using a stem-and-leaf plot?
- (A) It can only be used for small datasets
 - (B) It can only be used for categorical data
 - (C) It is difficult to read and interpret
 - (D) It can display the distribution of a dataset
 - (E) It is only used for numerical data

Open Ended Questions (FRQ)

- Q9.** Construct a stem-and-leaf plot for the following dataset: 23, 11, 45, 67, 32, 19, 58, 41, 29, 53. What can be inferred about the distribution of the dataset?
- Q10.** The following stem-and-leaf plot represents the scores of a class on a math test:
- endtabular Calculate the mean, median, and mode of

Chef's Tips

- Tip 1: Make sure students understand the concept of stem-and-leaf plots before administering the test
- Tip 2: Encourage students to use the stem-and-leaf plot to analyze and interpret the distribution of the dataset
- Tip 3: Consider providing additional practice problems for students to work on before the test
