

Foundation (Jalapeno)

- Q1.** What is the purpose of a two-way frequency table?
- (A) To display one-variable data
 - (B) To compare two variables
 - (C) To calculate statistics
 - (D) To create graphs
 - (E) To analyze trends
- Q2.** In a two-way table, what does the intersection of two variables represent?
- (A) Joint frequency
 - (B) Marginal frequency
 - (C) Relative frequency
 - (D) Conditional frequency
 - (E) Total frequency
- Q3.** Which of the following is an example of a two-way table?
- (A) 2×2 table
 - (B) 3×3 table
 - (C) 4×4 table
 - (D) All of the above
 - (E) None of the above
- Q4.** What is the term for the frequency of a particular combination of variables?
- (A) Relative frequency
 - (B) Joint frequency
 - (C) Marginal frequency
 - (D) Conditional frequency
 - (E) Cell frequency
- Q5.** How do you calculate the relative frequency of a cell in a two-way table?
- (A) Divide the cell frequency by the total frequency
 - (B) Divide the cell frequency by the row total
 - (C) Divide the cell frequency by the column total
 - (D) Multiply the cell frequency by the total frequency
 - (E) Multiply the cell frequency by the row total
- Q6.** What can be inferred from a two-way table with a strong association between variables?
- (A) No correlation between variables
 - (B) A cause-and-effect relationship
 - (C) A trend or pattern
 - (D) No trend or pattern
 - (E) A weak correlation
- Q7.** In a two-way table, what is the term for the frequency of a particular row or column variable?
- (A) Joint frequency
 - (B) Marginal frequency
 - (C) Relative frequency
 - (D) Conditional frequency
 - (E) Cell frequency
- Q8.** Which of the following is NOT a type of frequency in a two-way table?
- (A) Joint frequency
 - (B) Marginal frequency
 - (C) Relative frequency
 - (D) Conditional frequency
 - (E) Average frequency

Open Ended Questions (FRQ)

- Q9.** Create a two-way table to display the relationship between favorite sports (football, basketball, soccer) and favorite food (pizza, burger, salad) for a group of 30 students. Calculate the relative frequencies for each cell.

- Q10.** Analyze the association between the variables in the two-way table below.

hlineextMale
extFemale
hlineextTotal
endarray Interpret the results and draw conclusions about
