Open Ended Questions (FRQ)

- Q9.** A researcher is studying the effect of temperature changes on plant growth. The temperature changed from -4 to 2 degrees over a period of 3 days. What is the average change in temperature per day? Show your work and explain your answer.
- Q10.** A park ranger is monitoring the water level in a lake ecosystem. If the water level rises by 2 feet every day for 5 days, and then decreases by 1 foot on the sixth day, what is the net change in the water level? Use integers to represent the change in the water level and explain your answer.

Chef's Tips

- Tip 1: Ensure students use the correct units for their answers.
- Tip 2: Remind students to show their work and explain their reasoning for free response questions.
- Tip 3: Encourage students to use real-world examples to help them understand the concepts.
