- Q10.** Create a number line and plot the rational numbers $\frac{1}{2}$, 0.75, and $-\frac{3}{4}$. Label each point and show the relationships between them. Be sure to include arrows at the ends of the number line.

Chef's Tips

- Emphasize the importance of converting between fractions and decimals.
- Remind students to simplify their fractions.
- Encourage students to use a number line to visualize the relationships between rational numbers.
