

## Homework 1

- Q1.** What is the variable in the expression  $2x$ ?  
(A) 2  
(B)  $x$   
(C)  $2x$   
(D) +  
(E) None of the above
- Q2.** Identify the constant term in  $3y + 2$ .  
(A)  $3y$   
(B) 2  
(C) +  
(D) 3  
(E)  $3y + 2$
- Q3.** What operation does the symbol  $+$  represent in  $4 + 5$ ?  
(A) Subtraction  
(B) Addition  
(C) Multiplication  
(D) Division  
(E) None of the above
- Q4.** What is the coefficient of  $x$  in  $-2x$ ?  
(A)  $-2$   
(B)  $x$   
(C)  $2x$   
(D)  $-x$   
(E) 2
- Q5.** Which part of the expression  $4x - 3$  is the term with the variable?  
(A)  $4x$
- (B)  $-3$   
(C) 4  
(D)  $x$   
(E)  $-$
- Q6.** What does the term  $3 \cdot 2$  represent in terms of operations?  
(A) Addition  
(B) Subtraction  
(C) Multiplication  
(D) Division  
(E) None of the above
- Q7.** Identify the expression that shows 3 added to  $x$ .  
(A)  $x + 3$   
(B)  $x - 3$   
(C)  $3x$   
(D)  $3 - x$   
(E)  $x \cdot 3$
- Q8.** What is the order of operations represented by PEMDAS?  
(A) Parentheses, Exponents, Multiplication and Division, and Addition and Subtraction  
(B) Parentheses, Multiplication and Division, Exponents, and Addition and Subtraction  
(C) Parentheses, Addition and Subtraction, Exponents, and Multiplication and Division  
(D) Parentheses, Exponents, Addition and Subtraction, and Multiplication and Division  
(E) None of the above

### Open Ended Questions (FRQ)

- Q9.** Draw a simple algebraic expression that represents the phrase '5 more than  $x$ '. Explain what each part of your expression represents.
- Q10.** Explain in your own words the difference between a constant and a variable in an algebraic expression. Provide a simple example of each.

### Chef's Tips

- Ensure students understand that variables are letters that represent unknown or changing values.
- Constant terms are numbers without variables, and coefficients are numbers multiplied by variables.
- Students should be able to identify and explain basic operators such as  $+$ ,  $-$ ,  $\cdot$ , and  $\div$  in simple expressions.
